The 2015 Greater Los Angeles Homeless Count

1. Executive Summary

The Carolina Survey Research Laboratory (CSRL) at the University of North Carolina at Chapel Hill (UNC-CH) and the Los Angeles Homeless Services Authority (LAHSA) collaborated in the design, implementation and analysis of the 2015 Greater Los Angeles Homeless Count (HC15). The CSRL's responsibilities were to provide methodology and process direction, to design and select all required samples, to develop estimation strategies, and to produce all survey estimates. LAHSA's roles included managing all other data collection tasks, which included conducting the street and shelter counts, establishing the contents of survey questions and forms, administering the demographic survey, compiling the estimates for presentation, and conducting a separate youth count.

Sampling played an important role in HC15. A variety of samples were needed for this study since, other than for overall homeless counts of the sheltered homeless, complete enumerations to obtain the needed counts were not practical. The geographic area targeted for all of these samples was the Los Angeles Continuum of Care, which defines the coverage area of the homeless services it provides.¹ In all, two sets of counts or rates of homelessness required some type of sampling for estimation purposes. They included (i) count of street homeless from a sample of well-defined geographic areas with the CoC in January 2015; & (ii) rates of various categories of homelessness from information gleaned from a face-to-face demographic survey. Shelter counts were complete enumerations and considered free of sampling error. The overarching goal of HC15 was to provide the homeless estimates LAHSA needed to plan and maintain its service programs.

Measures of the statistical quality were produced in the form of estimated standard errors wherever possible. HC15 street estimates were produced in SAS (Version 9.3), a statistical software package that is used to analyze data from complex sample surveys. SAS not only produces point estimates from survey data, but also enables us to compute the corresponding standard errors of these estimates using an appropriate survey design. Estimates at the CoC and Service Planning Area (SPA) level were the most precise since the sample was designed to include this capacity. However some estimates at the city council district (CD), because of the small sample sizes, proved to be unstable. They should be used with caution when the relative standard error (RSE) is greater than 30%.

¹ The Los Angeles Homeless Services Authority (LAHSA) Community of Care (CoC) includes all of Los Angeles county except for the cities of Pasadena, Glendale and Long Beach.

2. Background and Overview

As in the past, statistical sampling played an important role in the study of homeless persons in the Los Angeles Continuum of Care (CoC). The Carolina Survey Research Laboratory (CSRL) once again partnered with the Los Angeles Homeless Services Authority (LAHSA) in conducting the Los Angeles Homeless Count for 2015 (HC15). LAHSA's roles were to establish the information goals and to organize and manage all HC15 data field data gathering activities in the CoC. The CSRL's complementary responsibilities were to provide all needed technical assistance in conjunction with statistical sampling to produce findings for LAHSA to report from the data collected in all HC15 survey components given below. The overarching goal of HC15 was to produce the best possible estimates of homeless counts for the CoC as well as for numerous geographic and other defined subgroups of the CoC.² The target area of all HC15 samples was the CoC, which defines the coverage area of the homeless services LAHSA performs.³ LAHSA uses these findings to plan, maintain, and justify its service programs.

3. Homeless Street Count Sample

The main overall street homeless count for the CoC as a whole, as well as for various jurisdictions within the CoC (viz. SPAs, CDs, & SDs) was randomly sampled from 1,887 census tracts. It was agreed that the CSRL would: (i) develop the design for a sample of census tracts (CTs) that meet the minimum precision requirements of 15% relative standard error (RSE) for each SPA (sample sizes by other geographic jurisdiction will not be controlled through stratification), (ii) select the sample of CTs based on the design, (iii) review the survey questionnaires and forms developed by LAHSA, and (iv) perform the initial analysis of the collected sample data to enable LAHSA to report important current findings for the CoC. (See Appendix A for sample precision requirements.)

3.1 Design Summary

The initial design was to be a stratified single-stage without-replacement simple random sample of 966 out of the 1,887 Census Tracts that comprise the CoC for LAHSA. However, based on comparative precision of street count estimates, an alternative probability sample of 1,680 CTs, including the 966 CTs plus 714 others

² Geographic subgroups importance for the design of samples for HC15 will be limited to those defined by Service Planning Area (SPAs), Los Angeles County Supervisorial District (SD), and the City of Los Angeles (CD). "Other defined subgroups" will be limited to those defined by any of the following: people in families, single persons, chronically homeless, with severe mental illness, with chronic substance abuse problems, veterans, with HIV/AIDS, victims of partner abuse, and with disabilities.

³ The LAHSA CoC includes all of Los Angeles County except for the cities of Pasadena, Glendale and Long Beach.

from opt-in cities where all of their CTs were ultimately counted in January 2015, will be used to produce estimates of the unsheltered homeless population.⁴ A design summary table may be found in Appendix B.

3.2 Stratification and Allocation

Stratification was used in two ways here to produce the sample of 966 CTs: (i) to improve the precision of the homeless count estimates; and (ii) to control the composition of the sample by SPA to facilitate estimating homeless counts for these jurisdictions to prior specifications (RSE of 15%). Sampling stratification will improve the precision of estimates from a population when the variables used to define strata are correlated with what is being measured. Based on prior homeless counts, it was expected that the HC15 CT designation of hotspot or non-hotspot would correlate with the HC15 count by CT, since by its definition a “hotspot” CT is one where there is more homeless activity, and thus the expectation that a larger number of homeless persons will be enumerated. For this reason the HC15 hotspot/non-hotspot designation was one of the proposed stratification variables for CTs. Using SPA and HC15 hotspot status together with a special designation of Skid Row CTs, a total of 17 strata were formed to select the sample of 966 CTs for the HC15 street homeless count. Hotspots were identified by the CSRL as standardized CT estimates where the homeless count was one standard deviation above the mean. These CTs were sent to LAHSA and verified by their outreach team as current hotspots or not. Only current hotspots were kept as hotspots for sampling purposes.

The other CT stratification variable in choosing the sample of 966 CTs was SPA. This variable was used for stratification mainly to control the number of CTs that would be chosen in each SPA. LAHSA was particularly interested in being able to produce estimates of acceptable precision (RSE of 15% or less) for the CoC, LA City, and by SPA. Our approach then was to meet precision requirements for each SPA, with the idea that CT sample sizes will be sufficiently great for the CoC and LA city to be able to meet the 15% RSE requirement for them as well. In SPAs 2 and 5, the 15% RSE sample size was deemed too low by LAHSA staff and was therefore increased to correspond to an RSE of 10%. In SPAs 3, 7 and 8, the RSE was set to 5 percent. The only exception to the minimum 15% rule was SPA 1, 4 and 6 where the RSE was cut to 20%. The recommended overall CT sample size of 966 coming out of this allocation strategy was confirmed by LAHSA to be manageable by their field staff.

3.3 Selection and Field Operations

Simple random sampling without replacement was used to select the sample of CTs in each of the 17 strata. We applied SAS *PROC SURVEYSELECT* to an established frame file of CTs in the CoC to randomly choose the

⁴ Opt-in commitment could not be ascertained prior to sample selection, so could not be considered prior to enumeration.

CT sample and record their corresponding selection probabilities for subsequent weights computation. Since CT nonresponse did not occur, there was no need to select a substitute sample of CTs in each stratum.

3.4 Sample Weights

Since there was no nonresponse in counting street homeless in the sample of 966 CTs, the sample weight for each CT in this sample was simply the inverse of its selection probability (i.e., the sampling rate for the stratum in which the CT was chosen, N_h/n_h).

Table 1. Original Street Count Sample Design

SPA	STRATUM	HOTSPOT	FRAME	SAMPLE	WEIGHT
1	1	Y	7	7	1
	2	N	63	50	1.26
2	3	Y	12	12	1.00
	4	N	381	71	5.37
3	5	Y	19	19	1.00
	6	N	306	149	2.05
4	7	Y	42	42	1.00
	8	N	221	120	1.84
5	9	Y	21	21	1.00
	10	N	122	81	1.51
6	11	Y	43	43	1.00
	12	N	162	79	2.05
7	13	Y	13	13	1.00
	14	N	251	107	2.35
8	15	Y	3	3	1.00
	16	N	218	146	1.49
9	17	Y	3	3	1.00
	~	~	1,887	966	~

Weights for the additional sample of 1,680 CTs required a different set of implied strata for computing weights and analysis. Within SPA, strata were formed as self-representing (enumerating all CTs within SPA or opt-in city) or not. This classification resulted in 13 strata.

Table 2. New Strata and Sample Design to Accommodate Opt-in Cities

SPA	STRATA	SELF- REPRESENT	FRAME	SAMPLE (I)	WEIGHT (II)	SUM (I x II)
1	1	Y	50	50	1.00	50
	2	N	20	19	1.05	20
2	3	Y	280	280	1.00	280
	4	N	113	18	6.28	113
3	5	Y	220	220	1.00	220

8	13	Y	221	221	1.00	221
		N	0	0	~	
			1,887	1,680		1,887

4. Homeless Shelter Count (No Sampling)

The HC15 count of shelter homeless was completed for all shelters in the CoC. This 100% enumeration of homeless residents was conducted by LAHSA staff and produced the total number of current sheltered homeless in the CoC at the end of January 2015.

4.1 Design Summary

The shelter counts were from a 100% enumeration of shelters, and thus not subject to sampling error. This does not preclude the possibility of other sources of error in these estimates (e.g., due to measurement), however.

4.2 Stratification and Allocation

The 2015 Housing Inventory Chart of emergency shelters, transitional housing and safe havens was used as a base for compiling a complete shelter list in the CoC. It was vetted with input from homeless coalitions, shelter providers, and LAHSA staff.

4.3 Selection and Field Operations

The night a facility reported its homeless numbers was dependent upon where that facility was located. Agencies with programs located in Service Planning Areas (SPAs) 3 and 7 performed their counts on the night of January 27th; SPAs 5 and 8 were performed on January 28th; and SPAs 1, 2, 4 and 6 were performed on January 29th. These nights corresponded with the nights of the street count. Quality checks comparing capacity to occupancy, zero count reports, prior count reports, as well as other measures were taken to improve response accuracy. In all, 315 shelters were included for the point-in-time shelter census. The response rate was 100%. See Appendix E for a tally of the shelter counts.

5. Demographic Survey – Street Homeless Sample

The sample of street homeless persons for a face-to-face demographic survey was chosen randomly by a stratified random sample of 228 CTs. This sample of CTs was randomly selected from the 966 CTs in the CoC that was selected for the street count. As in HC13, replacement (random or otherwise) of selected CTs was disallowed for the street homeless sample. Data collection occurred between January 7 to March 24, 2015 by LAHSA staff.

5.1 Design Summary

As in HC13, the design for sampling street homeless persons called for a two stage random selection of street homeless persons from a stratified (without replacement) simple random sample of 228 CTs that served as PSUs that was followed by the random (second stage) selection and interviewing street homeless persons within each sample CT. At the conclusion of data gathering and cleaning, useable respondent data were available for 2,122 street homeless persons sampled from the selected CTs. A design summary table may be found in Appendix C.

5.2 Stratification and Allocation

Allocation of the sample of 228 CTs was based on the HC13 Neyman allocation of the overall sample size and the optimum delineation to street sample within SPA. Average sample cluster sizes in this allocation of CTs and the prior allocation of street homeless respondents implied average respondent sample cluster sizes of around 17-18 in each SPA.

The targeted number of selected CTs in the h^{th} stratum (n_h) was determined so that within each SPA the two sampling strata corresponding to HC15 hotspot and non-hotspot CTs were selected with sampling rates

that were proportional to the average estimated HC13 homeless street count in the stratum (\bar{c}_h). See the PSU selection row in Appendix C for details on how this was accomplished. No stratification was imposed in identifying the sample of homeless persons within each sample CT (the SSU).

5.3 Selection and Data Collection

Within each of the 228 selected CTs, all street homeless persons were approached for an interview and paid a \$5 gift card for their participation. Since there is no direct way to determine within-CT selection probabilities for homeless persons based on this sampling approach, we have assumed it to be a simple random sample of homeless persons. While in HC13 the reality of the sampling and interviewing operation was that not all CTs were visited for various reasons (e.g., the location was considered too remote, there was too large an area to cover, too few homeless persons, etc.), LAHSA agreed to complete sampling and interviewing work per these specifications in all 228 CTs for HC15. Targeted sample sizes per CTs were provided to LAHSA staff. In some CTs they exceeded the targeted sample size and in others underenumerated. At the end of data collection we were left with 2,122 street interviews.

5.4 Sample Weights

A sample weight (i.e., a nonresponse adjusted “base weight”) for each individual homeless respondent in the street segment of the demographic survey was computed for each survey respondent in two basic steps: (1) compute the pre-calibration weight as the inverse of the respondent’s overall nonresponse-adjusted selection probability, which is the probability of selecting its CT (i.e., the CT sampling rate within its PSU stratum) times the probability of the respondent being selected and responding within its CT; and (2) calibrate the adjusted base weight so that the calibrated final weights, when summed among respondents in each PSU stratum, equals the final HC15 Homeless Count estimates by stratum for the street count.

6. Demographic Survey – Shelter Homeless Sample

As in HC13, the sample of shelter homeless persons for the face-to-face demographic survey was chosen from the HMIS (Homeless Management Information System) database. It included 14,293 records taken from shelters in the CoC for the month of January 2015 that were considered active residents. For the purposes of producing HC15 sheltered subpopulation estimates, the sample was assumed to represent the entire sheltered homeless population for the month of January, which corresponds to the same time period that the sheltered count occurred. Therefore, HMIS data were treated as a census or complete coverage of the sheltered population and was considered self-weighted.

7. Producing Estimates for 2015 Homeless Street Count

7.1 Street Count Estimates

HC15 street estimates were produced in SAS (Version 9.3), a statistical software package that is used to analyze data from complex sample surveys. SAS not only produces point estimates from survey data, but also enables us to compute the appropriate standard errors of these estimates using an appropriate survey

design. Estimated street totals and their associated standard errors were produced using the PROC SURVEY procedures in SAS. Unsheltered street counts were extrapolated using actual accounts from sampled tracts which took into account how the sample was drawn (i.e., probability of selection and stratification). Though the separate youth count conducted by LAHSA in March was not part of the sample design, the counts were not part of the HC15 total because duplication with the street count could not be ruled out. See Appendix D for the unsheltered street estimates using SAS.

An important component of the unsheltered street estimates was producing good estimates for the number of people assumed to be in cars, vans/campers, tents and encampments. Given that volunteers could not determine these numbers during the January street counts, estimates had to be produced and multiplied by number of times such observations occurred. These so-called conversion factors were based on data gathered in the demographic survey that asked respondents to estimate the number of people that typically stayed with them under such circumstances. The weighted estimates from the demographic survey produced the following conversion factors for HC15, since the demographic weights are dependent on the street count, iterative procedures were implemented: i) cars = 1.17; ii) vans = 1.43; iii) campers/RVs = 1.69; iv) encampment = 1.81; and v) tents = 1.55. These conversion factors are assumed to be constants, and thus did not contribute to the estimated sampling error of our estimates.

7.2 Street Family Count Estimates

In 2009, we realized that street count family estimates were being underestimated due to the likelihood that some families were somewhat sheltered on the streets by seeking shelter in cars, vans, campers, and encampments. To produce conversion factors for this scenario, we again used results from the demographic survey, but split estimates based on the likelihood that a family was present, and when present the average family size. Based on answers to the HC15 demographic survey, we estimated that 6 percent of people in tents were likely to be families, 5 percent encampment dwellers were likely to be families, 15 percent of families were residing in cars, 9 percent in vans, and 7 percent in campers. Individual and family size estimates also changed as seen in Table 3. HC13 family and individual rates were used because HC15 demographic surveys did not include enough family estimates to be stable.

Table 3. Family and Individual Conversion Factors based on Observable Street Conditions

<i>DWELLING TYPE</i>	<i>Family Conversion Factor</i>	<i>Individual Conversion Factor</i>
Encampment	4.46	1.81
Car	3.13	1.17
Van	3.97	1.43
Camper/RV	3.23	1.69
Tent	2.74	1.55

7.3 Annualized Estimates

Annualized estimates were produced in the same manner as HC13 and guided by procedures established by Burt and Wilkins (2005). The formula was modified to facilitate production of annualized subpopulation estimates and is conceptually equivalent (see Figure 1 below).

Figure 1: Original Formula to Produce Annual Homeless Estimates

	A	B	C	Annual Estimate
$A + [(B * 51)(1 - C)]$	41,174	3381	29.48%	162,769

Where,

A = Point-in-Time Count;

B = Homeless within past 7 days, new to the area in past 7 days, or left the county during the past 7 days;

C = Proportion who have been previously homeless in the past 12 months;

Figure 2: CSRL Modified Formula to Produce Annual Homeless Estimates

	A_c	L_p	C_p	Annual Estimate
$A_c [1 + ((51 * L_p)(1 - C_p))]$	41,174	0.0821	0.2948	162,769

Where,

A_c = Point-in-Time Count;

L_p = Homeless within past 7 days, new to the area in past 7 days, or left the county during the past 7 days;

C_p = Proportion who have been previously homeless in the past 12 months;

The HC15 CoC annual homeless estimate, therefore, is 162,769. That is, over the course of one year LA's Continuum of Care can expect to see more than 162,769 homeless persons. The annual formula takes into account the number of people who became homeless within the last seven days or, if already homeless, if they are new to the area or left the county during the past 7 days (B or Lp). The assumption here is that this influx of homeless people is constant so it is multiplied by 51 to represent the remaining weeks of the year. However, this estimate will overestimate the annual projection because some people will become homeless more than once during the year. Therefore, the annual projection is corrected by 1-C or the proportion of people homeless only once in the past year. The UNC-CH modified formula is equivalent to the Burt and Wilkins formula and eases calculations of multiple projections. Weighted sums were used to produce estimates of B, Lp and Cp. Ratios proved to be unstable.

7.4 Subpopulation Estimates

To produce estimates for important homeless subpopulations such as the chronically homeless, mentally ill, substance abusers and so on, prevalence rates of the specific subpopulation among all homeless persons first needed to be estimated from the demographic survey. If we use \hat{p} to denote this estimate, then the count of this subpopulation for on-street homeless is estimated to be $\hat{p}\hat{C}_{street}$, where \hat{C}_{street} is the total count estimate for the on-street homeless.

By the linearization, its standard error is estimated to be

$$\sqrt{\hat{p}^2 Var(\hat{C}_{street}) + (\hat{C}_{street})^2 Var(\hat{p})}$$

For the total count of the subpopulation, the estimate is given as $\hat{p}\hat{C}_{street} + C_{shel}$, with standard error given by

$$\sqrt{\hat{p}^2 Var(\hat{C}_{street}) + (\hat{C}_{street} + C_{shel})^2 Var(\hat{p})}$$

Appendix G includes our subpopulation estimates with estimated standard errors (represented as relative standard errors or RSEs which is simply determined by the standard error divided by the mean and expressed as a percentage). Precision of estimates can only be ascertained with appropriately derived standard errors. The estimates in Appendix G are the most precise estimates possible given the sample size and design used in HC15. Estimates at the CoC and SPA are generally very good. Precision goes down as sample goes down at the CD-level however.

SPECIAL NOTE: We recommend that data users verify any public release estimates by first examining the estimate in Appendix G and determining if the relative standard error (RSE) is less than 30%. If the RSE is less than 30% and the sample size is greater than 30, then the redistributed count will approximate the more precise estimate in Appendix G. If neither of those conditions are met, we recommend that the estimates be suppressed. The general rule of thumb given by the CDC, for example, is that estimates with a relative standard error greater than 30% should be suppressed and not released for public use (i.e., the estimate is too unstable).

Design Summary Table for HC15 Demographic Survey Sample Design Aimed at the Street Homeless

DESIGN SUMMARY TABLE: HC15 Demographic Survey of Street Homeless

Survey Population = Homeless persons of any age who were living on the street in the LAHSA Continuum during data collection for the 2015 Demographic Survey

Observational Unit = Homeless person

Key Measurements = Binary (0/1) indicator of whether or not the homeless person possess the trait for which specific homeless count is sought

Stage	Sampling Unit and Frame Source (What is being sampled and from what sampling frame?)	Stratification (Stratify by what? Which sample allocation approach?)	Sample Selection (How will random selection be used?)	Overall Respondent Sample Size
1	<p>Primary Sampling Unit (PSU): Census Tract (CT)</p> <p>Frame: Listing of 1,887 CTs that jointly define the Continuum of Care (CoC) for LAHSA.</p>	<p>$H = 17$ strata formed by:</p> <ul style="list-style-type: none"> 8 Service Planning Areas (SPAs), excluding 3 Skid Row CTs in SPA 4) HC13 hotspot status designation (hotspot/non-hotspot) 17th stratum includes 3 Skid Row CTs <p>Allocation:</p> <ul style="list-style-type: none"> Disproportionate <ul style="list-style-type: none"> Goal: Overall SPA-specific sample sizes based on RSE precision requirements for SPA level estimates CT sample size for the two HC13 hotspot/non-hotspot strata in each SPA disproportionately allocated to approximate PPS sampling within SPA $n_h \geq 2$ in each of $H=17$ strata 	<ul style="list-style-type: none"> SRS WOR selection disproportionately within each of $H = 17$ strata as a proxy to PPS sampling within each SPA Use sampling rates, $f_h = n_h / N_h$ (for the two HC13 hotspot status strata within SPA) that are directly proportional to the estimated average HC11 homeless street count in the stratum (\bar{c}_h) based on weighted estimates from the HC11 sample of 614 CTs <ul style="list-style-type: none"> Use $1/f_h = N_h / n_h$ from HC13 sampling as the “weight” for the \bar{c}_h computations since they are linkable with the HC11 street count data For the HC13 sample of Demographic Survey CTs in each SPA, <ul style="list-style-type: none"> I determined what f_h is for each of the two size strata so that $f_h = k\bar{c}_h$, with k being some constant among strata. With n, \bar{c}_h and $f = n/N$ determined, and the total number of CTs in the SPA (N) known, I used $k = f / (\sum_{h=1}^2 W_h \bar{c}_h)$ to obtain values of f_h and n_h for the two HC13 hotspot strata in each SPA No CT nonresponse was anticipated; thus no CT substitution was needed or allowed; i.e., # of CTs selected=n_h 	<p>SPAs combined. Given the use of volunteers with no survey experience in the Demographic Survey of street homeless, the overall CT sample size (n) will be based on the number of CTs LAHSA can train and manage effectively to implement within-CT sampling and interviewing instructions correctly.</p>

**DESIGN SUMMARY TABLE FOR HC15 DEMOGRAPHIC SURVEY OF STREET HOMELESS
(Continued)**

Stage	Sampling Unit and Frame Source (What is being sampled and from what sampling frame?)	Stratification (Stratify by what? Which sample allocation approach?)	Sample Selection (How will random selection be used?)	Overall Respondent Sample Size
2	Secondary Sampling Unit (SSU): Homeless person ¹	<ul style="list-style-type: none"> • None 	<ul style="list-style-type: none"> • Based on a PPT slide from the LAHSA field staff training session for Demographic Survey field workers, it appears that the following quasi-random approach was used for selecting the second stage sample of individual homeless persons within each sample CT: <ul style="list-style-type: none"> • Divide the CT into a few (3-5) mutually exclusive and exhaustive segments with well-defined street boundaries; • Identify a segment to start the process, and a sequence of segments to use as needed; • Starting somewhere within the starting segment completely comb through the segments, looking for eligible homeless persons to interview as you go; • Complete an interview if you can with any encountered homeless person; • Continue completing interviews until you have completed the number required by UNC for the CT. 	<ul style="list-style-type: none"> • An overall sample of 2,255 homeless respondents was targeted; this amounts to an average of 17-18 responding homeless persons per sample CT. • The final count of street homeless respondents with useable data was 2,122.

¹Since field interviewing was mostly done from mid-morning until early afternoon in sample CTs, it is likely that sampled homeless were limited to those accessible individuals who were recognizably homeless, and raises the question of sample under-coverage of the street homeless population.

APPENDIX F

Demographic Survey Instrument

Hi, my name is... We're conducting a survey to better understand how we can meet the needs of people who are presently without a stable home in Los Angeles County. We will be providing a \$5 dollar McDonald's incentive card.

2015 GREATER LOS ANGELES HOMELESS COUNT

They Count. Will You?

Fill in completely  
Cross out mistakes  

The results of this survey will be used to improve the quality and variety of housing and services available. Your answers are completely confidential and any question refused will not result in any denial of services.

HAVE YOU TAKEN THIS SURVEY?

No  **Would you like to take the survey?** ☐ Yes ☐ No
Yes  **Thank you for your time!**

**If No, Go
To Staff
Use Only**

1 What are your initials?

First	Middle	Last

2 What is your date of birth?

M	M	/	D	D	/	Y	Y	Y	Y

3 IN THE LAST MONTH, which of the following best describes where you have been spending most of your nights? Choose *ONLY one*

- | | | |
|--|---|---|
| <input type="radio"/> Street, sidewalk or alley | <input type="radio"/> Apartment or home | <input type="radio"/> Abandoned building or parking lot |
| <input type="radio"/> Bus or train stop/station, transit center or airport | <input type="radio"/> Emergency shelter | <input type="radio"/> Car or truck |
| <input type="radio"/> Campgrounds or woods | <input type="radio"/> Foster care or group home | <input type="radio"/> Van, RV or camper |
| <input type="radio"/> Park, beach or riverbed | <input type="radio"/> Hospital, substance abuse or psychiatric treatment facility | <input type="radio"/> Outdoor encampment or tent |
| <input type="radio"/> Place not meant for human habitation | <input type="radio"/> Hotel or motel | <input type="radio"/> On a couch or extra space at a home of a friend or family |
| <input type="radio"/> Under bridge or overpass | <input type="radio"/> Jail or Prison | <input type="radio"/> Unconverted garage, attic or basement |
| <input type="radio"/> Declined/ Don't know | <input type="radio"/> Safe Haven | <input type="radio"/> With someone unknown because you needed a place to stay |
| <input type="radio"/> Other (specify): | <input type="radio"/> Transitional housing | |
| | <input type="radio"/> Youth shelter | |

2a ASK Birth Year or Age; Only if date of birth not provided

4 What race do you identify with? You can select one or more races.

Read categories and choose *ALL that apply*

- ☐ American Indian or Alaska Native
- ☐ Asian
- ☐ Black or African American
- ☐ Native Hawaiian or Other Pacific Islander
- ☐ White
- ☐ Other (Specify):
- ☐ Declined/ Don't know:

5 Do you identify yourself as Hispanic or Latino?

- ☐ Yes
- ☐ No
- ☐ Declined/ Don't know

6 What is your gender identity?

- ☐ Male
- ☐ Female
- ☐ Transgender, Male to Female
- ☐ Transgender, Female to Male
- ☐ Other
- ☐ Declined/ Don't know

7 Which of the following best represents your sexual orientation?

- ☐ Straight
- ☐ Gay or Lesbian
- ☐ Bisexual
- ☐ Unsure or questioning
- ☐ Decline/ Don't know

HOUSEHOLD COMPOSITION

8 IN THE PAST 6 MONTHS, have you lived with anyone else in any of the following situations?

Read each category AND list the number of people;
If answer is NO in any category, mark ZERO

If four (4) or more please write the number

Tent	0	1	2	3	
Car	0	1	2	3	
Van	0	1	2	3	
RV/ camper	0	1	2	3	
Make-shift shelter	0	1	2	3	
None of the Above	<input type="radio"/>				
Declined/ Don't know	<input type="radio"/>				

9 Are you currently pregnant or have you recently gotten someone pregnant?

- ☐ Yes
- ☐ No
- ☐ Declined/ Don't know

10 How many biological children have you had?

If six (6) or more please write the number

0	1	2	3	4	5	
---	---	---	---	---	---	--

- ☐ Declined/ Don't know

11 What is your current household type?

- ☐ Living alone → (If Alone, Skip to Q12)
- ☐ Adults with no children
- ☐ Single Parent
- ☐ Two Parents

In Q11, If NOT living alone fill in Chart 11a

11a In this table INCLUDE yourself

Total	Children Under 18	Adults 18 to 24	Adults Over 24
-------	-------------------	-----------------	----------------

If four (4) or more please write the number

How many are in your family?

0	1	2	3	0	1	2	3	0	1	2	3
---	---	---	---	---	---	---	---	---	---	---	---

PLEASE VERIFY THE TOTAL – IT MUST ADD UP

GENDER	Males	0	1	2	3	0	1	2	3	0	1	2	3
	Females	0	1	2	3	0	1	2	3	0	1	2	3
	Transgender, Male to Female	0	1	2	3	0	1	2	3	0	1	2	3
	Transgender, Female to Male	0	1	2	3	0	1	2	3	0	1	2	3
	Other	0	1	2	3	0	1	2	3	0	1	2	3
Hispanic / Latino		0	1	2	3	0	1	2	3	0	1	2	3
RACE	American Indian or Alaska Native	0	1	2	3	0	1	2	3	0	1	2	3
	Asian	0	1	2	3	0	1	2	3	0	1	2	3
	Black or African American	0	1	2	3	0	1	2	3	0	1	2	3
	White	0	1	2	3	0	1	2	3	0	1	2	3
	Native Hawaiian or Other Pacific Islander	0	1	2	3	0	1	2	3	0	1	2	3
Multiple/Other Race		0	1	2	3	0	1	2	3	0	1	2	3

LENGTH OF HOMELESSNESS

12 Is this your **FIRST TIME** living on the streets or in shelters without a home or a regular place to stay?

- ☐ Yes
- ☐ No
- ☐ Decline/ Don't know

13 **DURING THIS TIME**, how long have you been continuously living on the streets or in shelters without a home or a place to stay?

- ☐ 1 week or less
- ☐ 1 month or less
- ☐ 1 – 3 months
- ☐ 4 – 6 months
- ☐ 7 – 11 months
- ☐ 1 year or longer
- ☐ Decline/ Don't know

14 **IN THE PAST 12 MONTHS**, on how many separate occasions have you lived on the streets or in shelters without a home or a regular place to stay?

Indicate the number of episodes

- ☐ 1 time
- ☐ 2 – 3 times
- ☐ 4 or more times
- ☐ Decline/ Don't know

15 **IN THE PAST 3 YEARS**, how many times have you (and your family) been housed and then homeless again?

Indicate the number of episodes

- ☐ 1 time
- ☐ 2 – 3 times
- ☐ 4 or more times
- ☐ Decline/ Don't know

16 **IN THE PAST 7 DAYS**, have you spent one or more nights outside of LA County?

- ☐ Yes
- ☐ No
- ☐ Declined/ Don't know

VETERAN STATUS

17 Have you served on **ACTIVE DUTY** in the **U.S. Armed Forces?** (Army, Air Force, Navy, Marines Corps, or Coast Guard)

- ☐ Yes → (If Yes, Skip to 19)
- ☐ No → (If No, Ask Q18)
- ☐ Declined/ Don't know → (Skip to Q20)

18 Were you ever called into **ACTIVE DUTY** as a member of the National Guard or as a Reservist?

- ☐ Yes
- ☐ No → (If No, Skip to Q20)
- ☐ Declined/ Don't know → (Skip to Q20)

19 Which years did you serve?

Choose ALL that apply

- ☐ Between WWI and WWII 1918 – 1940
- ☐ World War II 1940 – 1947
- ☐ Between WWII and Korean War: 1947 – 1950
- ☐ Korean War: 1950 – 1955
- ☐ Between Korean War and Vietnam Era: 1955 – 1964
- ☐ Vietnam Era: 1964 – 1975
- ☐ Post – Vietnam: 1975 – 1991
- ☐ Persian Gulf Era: 1991 – 2001
- ☐ Post – 9/11: 2001 – Present
- ☐ Declined/ Don't know

19a What is your discharge status?

- ☐ Honorable
- ☐ General
- ☐ Medical
- ☐ Bad Conduct
- ☐ Dishonorable
- ☐ Other than Honorable
- ☐ Still on Active Duty
- ☐ Other (specify):
- ☐ Declined/ Don't know

HEALTH

- 20** Do you have, have you ever had, or has a healthcare provider ever told you that you have any of the following medical conditions?

Read each category AND choose ALL that apply

- ☐ AIDS / HIV-related illness
- ☐ Long continuing alcohol abuse
- ☐ Long continuing drug abuse
- ☐ Serious and long continuing mental illness (including bipolar disorder and schizophrenia)
- ☐ Physical disability
- ☐ Chronic or ongoing physical illness
- ☐ Chronic or ongoing depression
- ☐ Post-traumatic stress disorder (PTSD)
- ☐ Traumatic brain injury
- ☐ Developmental disability
- ☐ None of the above
- ☐ Declined/ Don't know

- 21** Do you have any ongoing health problems or medical conditions?

(Such as diabetes, cancer or heart disease)

- ☐ No
- ☐ Yes → specify:
- ☐ Declined/ Don't know

- 22** Did you indicate a disability or medical condition in Q20 or Q21 above?

- ☐ Yes
- ☐ No → (If No, Skip to Q23)

- 22a** Is your disability or medical condition permanent or long-term?

- ☐ Yes
- ☐ No

- 22b** Does your disability or medical condition require you to seek help or assistance in order to live independently?

- ☐ Yes
- ☐ No

- 22c** Would your disability or medical condition be improved if stable housing was provided?

- ☐ Yes
- ☐ No

SAFETY & RESIDENCY

- 23** Have you been a victim of domestic or intimate partner violence, dating violence, sexual assault, or stalking?

- ☐ Yes
- ☐ No
- ☐ Declined/ Don't know

- 24** IN THE PAST 6 MONTHS, how many times have you or a member of your family been admitted to the emergency room or hospital?

If four (4) or more please write the number 

- ☐ 0
- ☐ 1
- ☐ 2
- ☐ 3
-

- 25** How long have you been living in Los Angeles County?

- ☐ Born in Los Angeles County
- ☐ 1 week or less
- ☐ 1 month or less
- ☐ 1 – 3 months
- ☐ 4 – 6 months
- ☐ 7 – 11 months
- ☐ 1 – 2 years
- ☐ 3 – 5 years
- ☐ 6 – 9 years
- ☐ 10 years or more
- ☐ Declined/ Don't know

- 26** Before you lost your housing, where were you living?

- ☐ Los Angeles County → (Answer Below)
Indicate City or Community

- ☐ Southern California (Orange, Riverside, San Bernardino, San Diego or Ventura)
- ☐ Other County in California
- ☐ Out of State
- ☐ Foreign Country
- ☐ Declined/ Don't know

SYSTEMS INVOLVEMENT

27 Have you ever been in any of the following?

Read each category AND choose ALL that apply

- ☐ Foster Care
- ☐ Juvenile Detention or Probation Camp
- ☐ Jail or Prison
- ☐ Adult Probation
- ☐ None of the above
- ☐ Declined/ Don't know

28 IN THE LAST 12 MONTHS, have you been released from a correctional institution such as a jail or prison?

- ☐ Yes
- ☐ No → (If No, Skip to Q29)

28a Did the correctional institution provide you with information for any of the following resources?

Read each category AND choose ALL that apply

- ☐ Job training or Transportation
- ☐ Mental health services
- ☐ Shelter or housing
- ☐ Social services
- ☐ Substance abuse programs
- ☐ None of the above

28b Were you released as an AB109 probationer?

AB 109 shifts the responsibility for incarceration from the state to the county, also known as prison realignment

- ☐ Yes
- ☐ No
- ☐ Decline/ Don't know

29 Have you ever been ticketed for any of the following actions?

Read each item AND choose ALL that apply

- ☐ Camping
- ☐ Jaywalking
- ☐ Loitering
- ☐ Not having a valid pass on public transit
- ☐ Pet Citations
- ☐ Sleeping in public places or outside
- ☐ Urination
- ☐ Declined/ Don't know
- ☐ None of the above

ACCESS TO SERVICES

30 Have you ever been denied access or turned away from a shelter in Los Angeles County?

- ☐ Yes
- ☐ No → (If No, Skip to Q31)

30a Why were you denied access or turned away? Choose ALL that apply

- ☐ Bad credit
- ☐ Children not allowed
- ☐ Criminal record
- ☐ Did not meet age requirement
- ☐ Drug or alcohol issues
- ☐ Immigration issues
- ☐ Lack of housing
- ☐ Mental health issues
- ☐ No ID/ Identification
- ☐ No beds available or timed out
- ☐ Not a former foster youth
- ☐ Partner or friend not allowed
- ☐ Pets not allowed
- ☐ Physical health issues
- ☐ Pregnant
- ☐ Other (Specify):
- ☐ Declined/ Don't know

31 Which of the following services or programs are you currently using?

Read each category AND choose ALL that apply

- ☐ Alcohol or drug abuse services or counseling
- ☐ Case management services
- ☐ Drop-in centers or day shelter
- ☐ Emergency shelter
- ☐ Emergency food
- ☐ Education services
- ☐ Health Care
- ☐ HIV Testing
- ☐ Housing location or placement assistance
- ☐ Job training or placement
- ☐ Legal assistance
- ☐ Mental health support, services, or counseling
- ☐ None of the above

EDUCATION AND EMPLOYMENT

32) What is the highest level of school you have completed?

- ☐ No schooling completed
- ☐ 8th grade or below completed
- ☐ Some high school completed
- ☐ 12th grade, no diploma
- ☐ High School Diploma
- ☐ GED
- ☐ Some college completed
- ☐ Associate's Degree
- ☐ Vocational Degree or Certificate
- ☐ College Degree
- ☐ Graduate Degree
- ☐ Declined/ Don't know

33) Are you currently enrolled in any educational program?

- ☐ High School
- ☐ GED prep
- ☐ Trade, technical, or vocation program
- ☐ Community college
- ☐ 4-year college or university
- ☐ None of the above
- ☐ Declined/ Don't know

34) How would you describe your employment situation?

Choose ALL that apply

- ☐ Employed and looking for additional work or increased hours
- ☐ Day labor
- ☐ Disabled and unable to work
- ☐ Full-time (more than 25 hours)
- ☐ Part-time (25 hours or less)
- ☐ Panhandling
- ☐ Recycling
- ☐ Seasonal
- ☐ Temporary
- ☐ Unemployed; actively looking for work
- ☐ Unemployed; not actively looking for work
- ☐ None of the above

LOSS OF HOUSING

35) What do you think are some of the main reasons or conditions that led to your loss of housing?

Choose ALL that apply

- ☐ Break-up, divorce or separation
- ☐ Child support issues
- ☐ Conflicts with family or household members
- ☐ Death, illness of family member or child
- ☐ Domestic violence
- ☐ Family Homelessness
- ☐ Eviction or Foreclosure
- ☐ Kicked out from home due to sexual orientation or gender identity
- ☐ Left or aged out of foster care
- ☐ Medical, physical disability or illness
- ☐ Mental health issues
- ☐ No friends or family available
- ☐ Release from hospital, treatment facility or other institution
- ☐ Recent immigration
- ☐ Release from jail or prison
- ☐ Substance abuse (drugs or alcohol)
- ☐ Timed out or left previous housing program
- ☐ Unemployment or financial reasons
- ☐ Other (specify):
- ☐ Declined/ Don't know

36) Which of the following would have helped you keep a home or a regular place to stay?

Read each category AND choose ALL that apply

- ☐ Alcohol or drug counseling
- ☐ Disability benefits
- ☐ Employment assistance
- ☐ Family counseling
- ☐ Legal Assistance
- ☐ Mental health services
- ☐ Medical health services
- ☐ Rent or mortgage assistance
- ☐ Other (specify):
- ☐ Declined/ Don't know

BARRIERS TO HOUSING

37 What keeps you from stable housing?

Choose ALL that apply

- ☐ Agency hassle/ hoops/ runarounds
- ☐ Agency too busy or full
- ☐ Alcohol use
- ☐ Can't afford rent
- ☐ Can't find a roommate
- ☐ Don't like rules of housing programs
- ☐ Don't have transportation
- ☐ Don't know where to go
- ☐ Don't meet eligibility requirements
- ☐ Don't want to return to DCFS
- ☐ Drug or substance use
- ☐ Immigration status
- ☐ Mental health (e.g. depression, anxiety, etc.)
- ☐ My choice
- ☐ No income
- ☐ Other (specify):
- ☐ Declined/ Don't know

ASSISTANCE

38 Are you currently receiving any of the following forms of government assistance?

Read each category AND choose ALL that apply

- ☐ CalWORKs / TANF
- ☐ CAPI - Cash Assistance Program for Immigrants
- ☐ Child support or survivor benefits
- ☐ State children's health insurance
- ☐ Food Stamps / EBT Card / CalFresh
- ☐ GR / GA – General Relief or Assistance
- ☐ Health Way L.A.
- ☐ Medicaid
- ☐ Medi-Cal / Medicare
- ☐ Section 8 or rental assistance
- ☐ SSI / SSDI / Disability
- ☐ SSA – Social Security Retirement
- ☐ Unemployment
- ☐ Veteran's Disability
- ☐ Veteran's Medical Center / Veteran benefits
- ☐ Veteran's Pension
- ☐ WIC - Women, Infants and Children
- ☐ None at this time

STAFF USE ONLY – DO NOT DUPLICATE OR COPY THIS SURVEY

- Thank the interviewee for participating and sharing information about their homeless experience.
- Give the interviewee the incentive/ food card ONLY if the survey was completed.
- Check to see if they want the enclosed referral guide.
- Make sure that you have filled out the food card tracking form.
- Fill out the information about the interview.

Surveyor, did you observe/ detect signs or symptoms of the following:

- ☐ Serious physical health conditions
- ☐ Severe, persistent mental illness
- ☐ Alcohol or drug abuse
- ☐ No observations

Surveyor, what is the status of the survey:

- ☐ Complete
- ☐ Partial
- ☐ Incoherent
- ☐ Refusal
